

## The Graphene Metrology Service

Graphene-Info has teamed up with world renowned laboratories to offer a unique graphene metrology service that provides characterization and analysis on graphene materials.

Dozens of companies are producing various types of graphene materials, which causes much diversification and confusion. Our metrology service offers graphene producers the chance to obtain valuable test results and post-testing analysis and interpretation, that assist in proving viability and quality of production. In addition, displaying critical data to customers like the material characteristics and potential applications is key to successful marketing and sales activities. A high-end metrology-based technical data sheet is a great boon to any company's marketing materials.

### Off-the-shelf Test Plans

We offer ready-to-go, off-the-shelf test plans, or we can customize the plan exactly to your needs.

### Follow-up Support

Both Graphene-Info and our lab partners will welcome further consultation regarding the test results and analysis.

### Single Point of Contact

The process is made easy by having Graphene-Info as your single point of contact in the entire process.

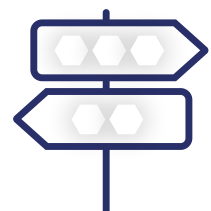

### Simple Process

Just send the samples and your requirements, and we'll handle the rest

### World-class Labs

The graphene metrology service is provided by world-class experts from leading laboratories in the UK, Israel and China.

### We are Flexible

Do you have different needs? Let us know! We can work together to build exactly the package for you.

### Price-range

Needs and budgets can vary greatly – and so do our pricing options. We offer various routes and options, from targeted tests to comprehensive analysis.

### Data Analysis Reports

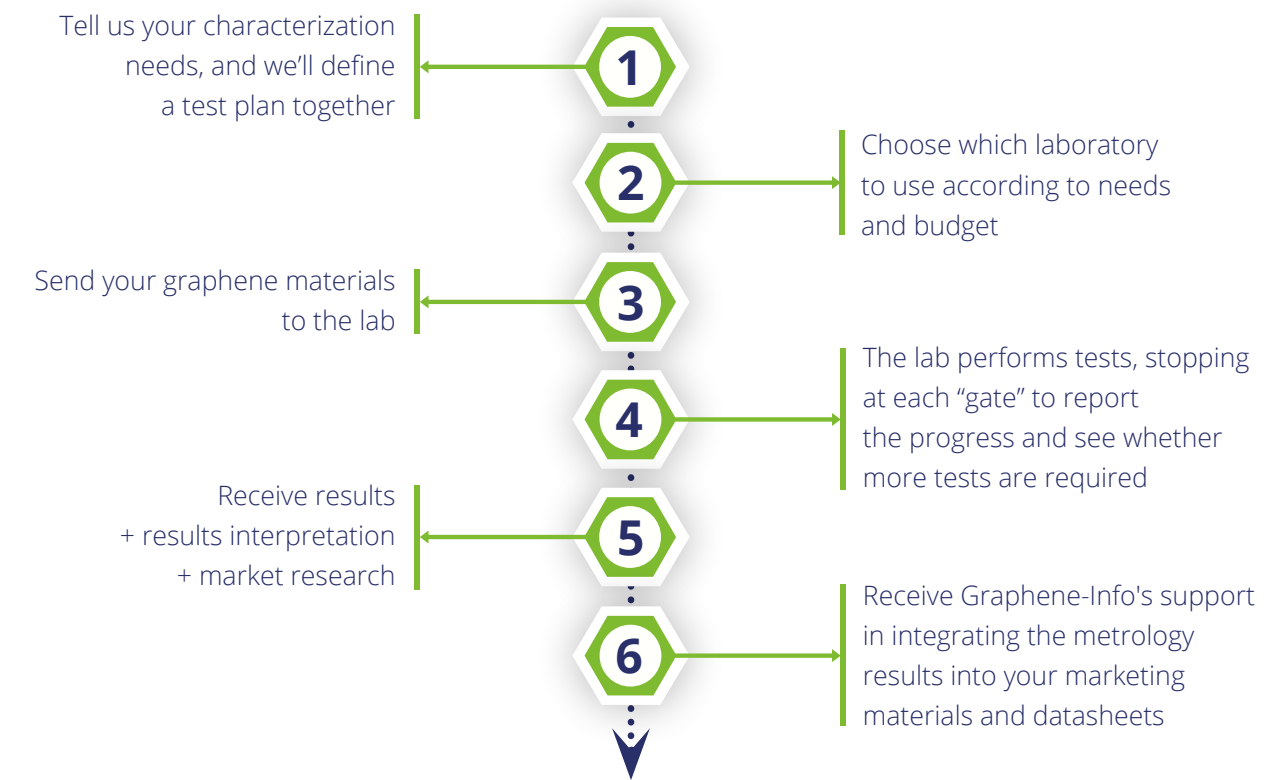

In addition to test results, we can also provide detailed analysis and interpretation of the results. This unique service helps understand the results in a way that can also be conveyed to customers or non-technical personnel.

### Graphene Market Insights

If required and applicable, we will draw from our experience and expertise to provide you with graphene market data for specific applications, competitive landscape, etc.

## How Does it Work?

Interested companies are invited to contact Graphene-Info (at [info@graphene-info.com](mailto:info@graphene-info.com)) for more information.

## About Graphene-Info

Graphene-Info, launched in 2009, is the world's leading graphene portal and publication. Enjoying a wide-reach into the graphene industry (with over 40,000 monthly readers and 14,000+ subscribers) Graphene-Info provides a multitude of services to the nascent graphene industry based on extensive and up-to-date knowledge hub and close ties with industry leaders.
